2008 IEEE International Conference on Global Software Engineering

ICGSE 2008

Message from General Chairs	viii
Organizing Committee	ix
Program Committee	x
Steering Committee	xi
Reviewers	xii
Acknowledgements	xiii

Keynotes

Software "manufacturing" - The Meeting Ground for Art and Science	xiv
The Coming Age of Virtual Organizations: Applying Lessons from the Early History of Geographically-Dispersed Collaboration	xv
Meeting Complexities Head-On: Leveraging Global Software Development for Competitiveness	xvi

Good Practices

On the Suitability of Particular Software Development Roles to Global Software Development.....	3
<i>Michael T. Lane and Pär J. Ågerfalk</i>	
Having a Foot on Each Shore - Bridging Global Software Development in the Case of SMEs	13
<i>Ita Richardson, Gabriela Avram, Sadhana Deshpande, and Valentine Casey</i>	
Guidelines for Effective Bridging in Global Software Engineering	23
<i>Allen E. Milewski, Marilyn Tremaine, Richard Egan, Suling Zhang, Felix Kobler, and Patrick O'Sullivan</i>	

Communication

A Comparative Empirical Study of Communication in Distributed and Collocated Development Teams	35
<i>Ban Al-Ani and H. Keith Edwards</i>	
Global Software Development and Delay: Does Distance Still Matter?	45
<i>Thanh Nguyen, Timo Wolf, and Daniela Damian</i>	
Experiences of Instant Messaging in Global Software Development Projects: A Multiple Case Study	55
<i>Tuomas Niinimäki and Casper Lassenius</i>	

Processes

Implementing Software Process Improvement Initiatives: An Analysis of Vietnamese Practitioners' Views.....	67
<i>Muhammad Ali Babar and Mahmood Niazi</i>	
Experiences with Agile Practices in the Global Studio Project	77
<i>Roger Urdangarin, Paulo Fernandes, Alberto Avritzer, and Daniel Paulish</i>	

Distributed Agile Development: Using Scrum in a Large Project.....	87
<i>Maria Paasivaara, Sandra Durasiewicz, and Casper Lassenius</i>	

Models for GSP

Patterns of Evolution in the Practice of Distributed Software Development in Wholly Owned Subsidiaries: A Preliminary Capability Model	99
<i>Rafael Prikladnicki, Daniela Damian, and Jorge Luis Nicolas Audy</i>	

Towards a Multi-criteria Development Distribution Model: An Analysis of Existing Task Distribution Approaches	109
<i>Ansgar Lamersdorf, Jürgen Münch, and Dieter Rombach</i>	

Developing an Inter-site Coordination Index for Global Software Development	119
<i>Sooraj P and Pratap K.J. Mohapatra</i>	

Managing Complexity in GSD

Managing Risks in Global Software Engineering: Principles and Practices	131
<i>Christof Ebert, Bvs Krishna Murthy, and Namo Narayan Jha</i>	

Integration of Design in Distributed Development Using D-Scenario Graph	141
<i>Ananya Kanjilal, Goutam Kanjilal, and Swapan Bhattacharya</i>	

Managing the Iterative Requirements Process in a Multi-national Project Using an Issue Tracker	151
<i>Christian R. Prause, Marius Scholten, Andreas Zimmermann, René Reiners, and Markus Eisenhauer</i>	

Reporting Experiences in GSD

The Impact of Fear on the Operation of Virtual Teams	163
<i>Valentine Casey and Ita Richardson</i>	

Reporting Empirical Research in Global Software Engineering: A Classification Scheme	173
<i>Darja Šmite, Claes Wohlin, Robert Feldt, and Tony Gorshek</i>	

Global Software Servicing: Observational Experiences at Microsoft.....	182
<i>Shilpa Bugde, Nachiappan Nagappan, Sriram Rajamani, and G. Ramalingam</i>	

Industry Track I

Global Software Development: Who Does It?	195
<i>Andrew Begel and Nachiappan Nagappan</i>	

ESB Enablement of an International Corporate Acquisition, an Experience Report	200
<i>Philip Hartman</i>	

Beyond Cost Reduction: Using Collaboration to Increase Innovation in Global Software Development Projects.....	205
<i>Theodore Forbath, Peter Brooks, and Anand Dass</i>	

Ailments of Distributed Document Reviews and Remedies of DOCTOR (DOCument Tree ORganizer Tool) with Distributed Reviews Support.....	210
<i>Krishnamurthy T.V and Sapna Subramani</i>	

Industry Track II

Adopting Agile in Distributed Development.....	217
<i>Kalpna Sureshchandra and Jagadish Shrinivasavadhani</i>	
Usage of SCRUM Practices within a Global Company	222
<i>Maurício Cristal, Daniel Wildt, and Rafael Prikladnicki</i>	
Evaluating a Networked Virtual Environment for Globally Distributed Avionics Software Development	227
<i>Redge Bartholomew</i>	
Continuous Improvement through Iterative Development in a Multi-Geography.....	232
<i>Jim Alain Laredo and Ravi Ranjan</i>	

Education Track

Improving Contextual Skills in Global Software Engineering: A Corporate Training Experience	239
<i>Rafael Prikladnicki and Leonardo Pilatti</i>	
Integration Starts on Day One in Global Software Development Projects	244
<i>Olly Gotel, Vidya Kulkarni, Christelle Scharff, and Longchrea Neak</i>	
Developing a Course on Designing Software in Globally Distributed Teams.....	249
<i>Patricia Lago, Henry Muccini, and Muhammad Ali Babar</i>	

Doctorial Symposium

Coordinating Mechanisms for Agile Global Software Development.....	257
<i>Emam Hossain</i>	
Challenges of Globally Distributed Software Development – Analysis of Problems Related to Social Processes and Group Relations.....	264
<i>Arttu Piri</i>	
A Metrics Based Approach to Evaluate Design of Software Components	269
<i>Kuljit Kaur Chahal and Hardeep Singh</i>	
A Readiness Model for Software Development Outsourcing Vendors	273
<i>Siffatullah Khan, Mahmood Niazi, and Rashid Ahmad</i>	

Author Index.....	278
